INDIVIDUAL COURSES TRAINING SERIES

Corporate Aviation Security

FIXED/ROTOR WING   **IPAD COMPATIBLE**   **APPROX 1.0 HRS**

Corporate Aviation Security focuses on assessing, preventing, and responding to aviation threats. This course can be used for training development on operator security protocol for new hires, as well as recurrent training to avoid complacency and ensure that updated security protocols are provided to all personnel.

For Part 91 pilot training, the Corporate Aviation Security includes measures to reduce vulnerabilities when flying into or out of both low and high level security airports.
