Your Co-Pilot in Aviation Training

INDIVIDUAL COURSES TRAINING SERIES

Performance-Based Communication and Surveillance (PBCS)

FIXED/ROTOR WING   **IPAD COMPATIBLE**   **APPROX 1.2 HRS**

Performance-Based Communication and Surveillance (PBCS) provides pilots with an overview of communication and surveillance elements of air traffic management so they may understand the relevant data link communications system theories as they apply to operational use. This course contains tutorials that cover PBCS, CPDLC and ADS-C.

For Part 135, Part 125, and Part 91 pilot training, our Performance-Based Communication and Surveillance (PBCS) course provides an excellent overview of PBCS for both domestic and international operators.

TUTORIALS

PBCS Overview

1. PBCS Overview, Approvals, and Authorizations

CPDLC Overview

1. CPDLC Overview

ADC-C Overview

1. ADS-C Overview

CPDLC - U.S. Domestic Operations

1. CPDLC - U.S. Domestic Operations

LESSONS

▶ Comprehensive examination covers subject matter from all lessons

Performance Based Communication and Surveillance (PBCS)

1. PBCS
2. CPDLC - Domestic Operations

3. CPDLC - Oceanic & Remote
4. ADS-C
