Lockout-Tagout

FIXED/ROTOR WING

IPAD COMPATIBLE

APPROX 1.1 HRS

Our Lockout-Tagout course covers the OSHA Control of Hazardous Energy (Lockout/Tagout) regulatory requirements (29 CFR 1910.147). It also provides instruction on types of hazardous energy and how to control them with lockout and tagout procedures and devices. These procedures protect employees from injury during servicing or maintenance and are an essential industry safety.

For Part 135, Part 125, and Part 91 maintenance training, Lockout-Tagout is necessary for the prevention of personal injury as well equipment damage.

TUTORIALS
